GIS Engineer
Multimind Creations
06/2015 - 07/2019   *New Delhi*
Tool and Technologies
- ARC MAP 9.3 AND MAPINFO 9.5
- 3D City Modelling

PERSONAL PROJECTS

1)CRYPTO-APP
- In this project ,I used **REACT JS** and **CHAKRA-UI** .
- I used an external API from CoinGecko and fetch data through axios.You can check coins value in INR,USD and EUR. You can also check a single coins static detail with the help of chart.
- **Link -** https://xcypto-app.netlify.app/

2) BUDGET PROJECT
- This is a cool **JAVASCRIPT** Project.
- This project allows us to add incomes and expenses for a current month. You can also remove item. A great feature is that it automatically shows the % value of each item w.r.t. total income.
- **Link -** https://deep-wallet.netlify.app/

3) MI-STORE CLONE
- **REACT JS** and **REACT BOOTSTRAP** are mainly used.
- An interface that will give an option of various types of products. With the help of routing,categories are created and also have login and sigup page.
- **Link** - https://clone-of-mistore.netlify.app/

4)PIG GAME || DOM MANIPULATION
- In this Pig game, I mainly used **JAVASCRIPT** .
- Game has two players. Dices are rolled by players and points are added to their global point, he loose their chance and score too if rolled dice have 1.person who get 100 points first is winner.
- **Link -** https://cube-rolling.netlify.app/

5)NATOURS || EXCITING TOURS FOR ADVENTUROUS PEOPLE
- This Tour booking website, I created with the help of **HTML** and **SCSS.**
- Pure CSS is used to open Pop-up, Cool effects and animations in cards and buttons. Video background and modern looking form along with Attractive navigation button to open and close.
- **Link -** https://exciting-tours.netlify.app/
